Director level engineer with research and management experience

Experience

Ingeteam, *Senior Industrial Cybersecurity Professional* *Oct 2026 - Present*
- Works across business units to align product and industrial cybersecurity initiatives with business priorities, customer requirements, and operational needs.
- Supports compliance with applicable cybersecurity regulations and standards, helping business units assess requirements and define implementation priorities.
- Contributes to securing industrial environments, working with technical and business stakeholders to address cyber risks while supporting operational continuity.

Cybertix, *Director of Industrial Cybersecurity* | Donostia-San Sebastián, Spain *Sep 2024 - Oct 2026*
- Leads and oversees the cybersecurity strategy and operations in industrial environments, focusing on protecting critical infrastructures.
- Designs, implements, and monitors proactive OT/IoT security measures and coordinates realistic cyberattack simulation exercises.
- Engages in research, publications, and training activities to disseminate best practices in industrial cybersecurity.
- **Technologies/Tools:** Industrial cybersecurity frameworks, OT security solutions, simulation platforms, AI-based security tools, incident response strategies.

Dojo Five, *Director of Engineering, Enterprise Development Services* | Remote (US) *Jan 2023 - Sep 2024*
- In charge of daily operations for the services side of the company, with 13 direct reports, handling the internal career ladder and promotion system. Supervising the execution of 11 projects in parallel.
- Responsible for hiring, planning, and customer relations.
- **Technologies/Tools:** Agile methodologies, JIRA, Trello, Slack, Microsoft Teams.

Deusto University, *Lecturer* | San Sebastian (Spain) *Sep 2022 - Sep 2023*
- Lecturer for telematics. Design of the curriculum, classes, and assignments.
- Mentoring and coaching of students.
- **Technologies/Tools:** C++, Python, MATLAB, Online Learning Platforms.

Dojo Five, *Team lead - Firmware development services* | Remote (US) *Jul 2022 - Jan 2023*
- In charge of execution of projects for external clients in an agile environment.
- In charge of customer satisfaction and modernization strategies.
- **Technologies/Tools:** C, C++, Python, Git, Agile/Scrum Methodologies.

Dojo Five, *Senior engineer - Firmware development services - security expert* | Remote (US) *May 2021 - Jul 2022*
- Working on multiple projects as developer and consultant, mainly focused on secure firmware development.
- From architectural design to implementation, focusing on project needs and timelines.
- **Technologies/Tools:** Embedded C, Security Protocols, Linux, IoT Platforms.

Ikerlan, *Senior Cybersecurity Researcher and Developer in Embedded Systems* | Mondragon, Spain (Onsite) *April 2020 - May 2021*
- Cybersecurity researcher and industrial cybersecurity engineer in embedded projects.
- **Technologies/Tools:** Embedded Systems, Cybersecurity Solutions, C/C++.

Education

Top 10%	**MBA**, *Quantic* | Remote, USA	*2020-21*
C. Laude	**Ph.D. in Telematics Engineering**, *University Carlos III of Madrid* | Madrid, Spain	*2016-20*
3.67/4	**Master in Engineering Technology**, *University of Houston* | Houston, US	*2015-16*
8.57/10	**Master in Telecommunications Engineering**, *University of Navarra* | San Sebastian, Spain	*2014-16*
8.76/10	**Telecommunication Engineering**, *University of Navarra* | San Sebastian, Spain	*2010-14*

Achievements: First in class for undergrad and two engineering masters | Highest score for Ph.D. and MBA.
Main speaker: In multiple podcasts and conferences.
Professor: In telematics and networking in 4 different universities in 3 different countries.

Skills

Programming	Python, C/C++, Java, CMake, Matlab, Git, Scripting (Bash), LaTeX, HTML, Vim
Security	Cryptography, KPI, secureboot, secure OTA, encryption, WolfSSL, OpenSSL, threat modeling.
Embedded	RTOS, Zephyr, FreeRTOS, embedded Linux, ADC, DAC, SPI, I2C, UART, CAN, BLE, low-power design techniques, OTA
Software	Linux, Docker, CI/CD, TDD, HIL, Automation Testing, Git/GitHub/GitLab, Data Analysis, Embedded AI, DevOps.
Soft Skills	Time Management, Problem-solving, Documentation, Leadership, Report System, Process Creation.
